# THE ALPINE FIT

## 100% BLISTER-FREE

### 01

#### CUSTOMIZEABLE FIT

Customizable Fit technologies allow you to tailor your fit to the unique shape of your foot – giving you all-day support to accommodate the range of movements necessary for any adventure in the mountains.

3D-Lacing

Climbing Lacing

### 02

#### HEEL LOCKING

Heel containment guarantees a combination of flexibility, ankle support and precise fit to prevent the formation of blisters.

Overlap Closing

Adaptive Eyelets

EXA-Shell

### 03

#### ERGONOMICS IN ACTION

State-of-the-art ergonomic technologies help to effectively wrap and support the foot in order to gain the best sporting performance.

Adaptive Foam

3F

## 04

### CLIMATE CONTROL

Climate Control ensures optimum temperature and humidity in your shoe, even during highly aerobic activities.

## 05

### GRIP

Outsoles are specially developed to produce excellent traction and durability in any conditions, without compromising comfort.

# TECHNOLOGY

## 3D-Lacing

### 3D LACING

3D Lacing divides the lacing system into three individually adjustable sections (forefoot, midfoot, cuff). This allows you to fine-tune and customize your fit and find balance between comfort and performance.

## 3F

### 3F

The trademark SALEWA 3F System connects the instep area of the shoe with the sole and heel; ensuring flexibility, support and the correct fit where it's needed.

## 3F Total

### 3F TOTAL SYSTEM

The 3F Total System provides additional support to your foot by connecting the 3F System to your shoe's lacing area. This connection ensures optimal comfort, stability and increases foot control where needed.

## Adaptive Foam

### ADAPTIVE FOAM

Adaptive memory foam closes all gaps between your heel and your shoe to provide a snug fit and support the ankle and lower foot.

## Adaptive Eyelets

### ADAPTIVE EYELETS

The Adaptive Eyelets work with the 3F Total System to increase the overall wrapping fit and comfort of the mid-foot.

## Anatomical Cuff

### ANATOMICAL CUFF

The Anatomical Cuff increases the ankle's rear range of motion and comfort during descents, thanks to a curved shape that follows the plantar flexion of the ankle.

## Climbing Lacing

### CLIMBING LACING

Climbing Lacing offers accurate adjustment in the toe-area of your shoe, giving you more support and performance when tackling technical terrain.

**EXA-Shell****EXA SHELL**

The EXA Shell grid structure wraps around your upper foot, providing you with a precise fit and perfect front-foot balance. The shell also minimizes abrasion of the upper material.

**MFF****MULTI FIT FOOTBED**

Climbing Lacing offers accurate adjustment in the toe-area of your shoe, giving you more support and performance when tackling technical terrain.

**MFF+****MULTI FIT FOOTBED +**

The innovative multi-layer MFF+ allows for more customization on the forefoot by using two interchangeable layers to accommodate a greater range of foot shapes and sizes.

**Motion Guidance****MOTION GUIDANCE**

The sole and midsole are developed in synergy to support the natural movement of the foot and provide excellent sure-footedness over any terrain.

**Overlap Closing****OVERLAP CLOSING**

Overlap Tongue Construction provides perfect wrapping and superior comfort in the arch area.

**Take Off****TAKE OFF SYSTEM**

Revolutionary Take-Off Technology facilitates the rapid, natural rolling motion of the foot during ascents and descents by positioning the toes in a slightly raised position.

**WTC Sole****WTC SOLE**

The WrapThread Combi sole offers outstanding lightness and walkability with durable cushion, thanks to an exclusive compact wrapping fit sole construction.

# ALPINE GRIP

From technical mountaineering to approach shoes, all of our outsoles are exclusive to SALEWA and developed together with the Vibram® technical department to reach the maximum possible level of grip, durability, and comfort.

As soles are the point of contact between the athletes and the ground, we are now showing the tread design and compound choice for each of our footwear models.

01

02

03

**MOUNTAINEERING**

**01 | VIBRAM TETON**

Perfect for high mountain winter and mixed conditions, offering wide grooves and strong lugs for optimal grip on mud and snow.

**02 | VIBRAM WTC**

Aggressive tread and a minimalistic profile provides a natural feel for optimal traction, lightness and walkability.

**03 | VIBRAM MULAZ**

Ideal for most mountaineering conditions, the outsoles are self-cleaning, grippy and offer traction on soil.

**ALPINE  
APPROACH**

---

**HIKING**

---

**TECH  
APPROACH**

---

**MOUNTAIN  
TRAINING**

---

**04 | VIBRAM MNT TRAINER**

Self-cleaning outsoles with deep grooves and aggressive lugs that guarantee traction on mud, snow and ferratas' ladders.

**05 | VIBRAM LYNX C**

Mix of aggressive lugs and grooves provide walkability and traction on via ferratas and effective downhill braking.

**06 | VIBRAM SALWALL**

Outsoles with the necessary grip, flexibility and durability to tackle the most demanding excursions in complete safety.

**07 | VIBRAM RGS**

Vibram® RollingGait System sole combination helps optimize energy output, minimize fatigue and improve endurance.

**08 | VIBRAM TECH APPROACH EVO**

Perfect for high mountain winter and Low profile and wide stud outsole made from the Vibram® sticky compound ensures grip in wet conditions and excellent edge performance.

**09 | VIBRAM REPTAIL**

Wide climbing area behind the toes and the Vibram® sticky compound ensures grip and traction over rocky, dry or wet terrain.

**10 | VIBRAM SCRAMBLER**

Self-cleaning 3-season sole unit provides grip on all surfaces and superb elasticity and performance on wet terrain.

**11 | MICHELIN® LITE TRAIN**

Aggressive sculptures and groove design combined with the MICHELIN® Outdoor Compound for great traction and adaptability on soft and uneven terrain.

**12 | MICHELIN® ULTRA TRAIN**

Lower grooves, small sculptures, longitudinal flex grooves, and the MICHELIN® Outdoor Compound provide outstanding traction and stability over hard terrain.

# MOUNTAINEERING

# ALPINE FIT

## MOUNTAINEERING

Master the most demanding passages on rock, on snow, or on icy sections.

Anatomical Cuff

Overlap Closing

WTC Sole

**Anatomical Cuff****ANATOMICAL CUFF**

The Anatomical Cuff increases the ankle's rear range of motion and comfort during descents, thanks to a curved shape that follows the plantar flexion of the ankle.

**Overlap Closing****OVERLAP CLOSING**

Overlap Tongue Construction provides perfect wrapping and superior comfort in the arch area.

**WTC Sole****WTC SOLE**

The WrapThread Combi sole offers outstanding lightness and walkability with durable cushion, thanks to an exclusive compact wrapping fit sole construction.

## RAVEN 2 GTX® MAKES LIGHT OF TOUGH TERRAIN

The Raven 2 GTX® goes anywhere, quickly. It's the ultimate summer mountaineering boot – offering exceptional durability and performance, all in a lightweight construction. The crampon-compatible Vibram® WrapThread Combi sole offers optimal traction and surefootedness over rough terrain without compromising comfort, due to the shoe's overlapping construction and the anatomical cuff. SALEWA's 3F System, 3D Lacing and MFF+ footbed ensure that the Raven SL fits perfectly to your foot.

[salewa.com](http://salewa.com)

3F System combining flexibility,  
anatomic ankle support and perfect fit.

STEP INTO  
THE LIGHT

Exclusive Vibram® WrappingThread Combi sole for traction, lightness and walkability.

High level of comfort due to the Overlap Tongue Construction and the Anatomical Cuff.

Compact & lightweight design based on an innovative sole & midsole construction.

## MOUNTAIN TRAINING

Train on and off the trail in a mountain environment

**Adaptive Eyelets****ADAPTIVE EYELETS**

The Adaptive Eyelets work with the 3F Total System to increase the overall wrapping fit and comfort of the mid-foot.

**3F Total****3F TOTAL SYSTEM**

The 3F Total System provides additional support to your foot by connecting the 3F System to your shoe's lacing area. This connection ensures optimal comfort, stability and increases foot control where needed.

**MICHELIN****MICHELIN® TECHNICAL SOLES**

Lower grooves, small sculptures, longitudinal flex grooves and the MICHELIN® Outdoor Compound provide outstanding traction and stability over hard terrain.

**Motion Guidance****MOTION GUIDANCE**

The sole and midsole are developed in synergy to support the natural movement of the foot and provide excellent sure-footedness over any terrain.

3F Total System combining flexibility,  
anatomic support and precise mid-foot fit.

GRIP

## LITE TRAIN THE LIGHTWEIGHT MOUNTAIN TRAINING SHOE

The Lite Train is designed for mountain training. Developed with MICHELIN®, the shoe strikes an ideal balance between performance, grip, durability and lightness. SALEWA's 3F Total System ensures optimal fit and foot support, while MICHELIN®'s special Outdoor Compound and aggressive outsole design ensures perfect surefootedness.

[salewa.com](http://salewa.com)

Performance and grip in a durable and lightweight construction.

Traction, adherence and optimised adaptability to different terrain thanks to a specially-made MICHELIN® technical sole.

Developed with  
MICHELIN® Technical Soles

# TECH APPROACH

# ALPINE FIT TECH APPROACH

Gain easy access to challenging climbs.

#### **EXA SHELL**

The EXA Shell grid structure wraps around your upper foot, providing you with a precise fit and perfect front-foot balance. The shell also minimizes abrasion of the upper material.

#### **MULTI FIT FOOTBED +**

The innovative multi-layer MFF+ allows for more customization on the forefoot by using two interchangeable layers to accommodate a greater range of foot shapes and sizes.

#### **VIBRAM REPTAIL SOLE WITH MEGAGRIP COMPOUND**

Wide climbing area behind the toes and the Vibram® sticky compound ensures grip and traction over rocky, dry or wet terrain.
