

SLEEPINGBAG

A revolution for the sleeping bag market. Sleeping bag colour coding now makes selecting exactly the right bag for you easier than ever before. Our sleeping bag collection has a temperature rating colour scheme enabling you to identify which sleeping bag matches your individual requirements 100%. The colour of the inside material also indicates a down, synthetic or hybrid sleeping bag.

SLEEPING BAG TECHNOLOGIES

SILVERIZED 100% FRESH

REVOLUTIONARY: FRESH DOWN

SALEWA has developed the world's first silver treatment for down fillings.

Clinical studies show that silver is effective against the bacteria that cause odours. Bacteria metabolise sweat and body moisture, emitting waste products that produce strong odours in a sleeping bag. The resultant odour is unpleasant. Silver ions destroy enzymes within the bacteria that are necessary for them to live. The bacteria die off without these enzymes.

Down benefits as follows: reduction of unpleasant smells caused by bacteria. This means that a treated sleeping bag doesn't smell, even after intensive use. This silverized down treatment dispenses with the need for two stages of chemical dipping, and so reduces the negative impact on the environment. Best of all: For the first time a down sleeping bag is a viable alternative for those suffering from dust allergies, where previously they had to rely on synthetic fillings.

Biocidal treatment based on silver chloride prevents proliferation of odour-producing bacteria.
