# HARNESSES TECHNOLOGIES

## 90SAFX BUCKLE

The Salewa 90SafX buckle (pat. pending) meets the highest safety standards: up to an angle of 90° the buckle is completely locked, without any slippage. Once beyond 90° the buckle can be released with minimal effort thanks to our Easy-Slide-Technology. This prevents accidental loosening of the buckle while retaining ease of use. The light version is a combination of aluminum and stainless steel maximising strength to weight ratio. The basic version is made completely from stainless steel.

## EVOBELT

The Salewa Evobelt maintains perfect symmetry on the sit harness: using a hybrid construction combines the flexibility of a floating waist belt with the advantage of a conventional sewn construction (fixed padding position). That means that the Evobelt is adjustable to any waist size allowing the gear loops to always remain on the sides within ergonomic, contortion-free reach. Once the correct position has been set slippage will not occur.

## VARIO WEBBING

The rock line harnesses use a special variable width webbing. This allows for the thinnest possible width where buckles are attached in order to save weight. In areas of high pressure the webbing is wide in order to absorb the resulting forces and distribute them evenly over the entire surface. Thus, our harnesses retain unmatched comfort.

# ERGO BELAY SYSTEM

## SMOOTH BELAYING

The Ergo Belay System puts an end to those octopus arm movements while belaying. Thanks to its unique ergonomic design and grip, the braking hand never has to leave the rope, meaning better efficiency, smoother handling and a safer experience.

[salewa.com](http://salewa.com)

Gives out rope faster without blocking.

Increased safety through fast engagement of locking mechanism.

Intuitive ergonomic handling, with both hands on the rope at all times.

FULL  
CONTROL

Developed by Chris Semmel,  
branch manager for the mountain and  
skiing guide association.

## 1720 ERGO BELAY SYSTEM

**ACTIVITIES:** Sports Climbing

**Lightweight ergonomic belay device with blocking function - for climbing outdoors and indoors.**

- A balanced weight distribution and a 20° offset shaft guarantee an optimal swing and allow for efficient belay mounting.
- Single handed, the grip can be adjusted without any supporting tool and guarantees a perfect hold on steep terrain.
- The anchor leash on the shaft, with tearing support of 5kN, is perfect for the self belay on the anchor.
- The grip can move upwards in snow and does not prevent the setting up of an anchor and its function as a supporting tool.
- The synthetic grip protects from the cold.
- The spike, made of hard metal, does not slide over an icy surface.
- Available with shovel and hammer.

# BACKPACKS

## THE SALEWA CARRYING SYSTEMS

Fit is the most important feature of a backpack.

Backpacks are somewhat like full suspension systems. They must react to every move you make.

### Air-Fit

Superior ventilation due to improved airflow between user and backpack.

### Contact-Fit

Less pack movement thanks to the way it sits closer on your back.

### Custom-Fit

Distribute your load more evenly thanks to a highly customisable carrying system.

### Ride-Fit

Designed for the specific demands of freeskiers, with ergonomic boomerang straps and velcro belt that go around the whole upper body.

### Easy-Fit

Comfortable fit due to smart use of padding.

Close Fit due to Contact Fit carrying system.

Strong, but low weight due to smart use of fabrics.

Quick access to mountaineering equipment on your harness due to v-shape that follows the bodily form.

Easy ice-axe attachment.

SPEED AND SIMPLICITY

## APEX 22 BACKPACK FOR SPEED MOUNTAINEERING ESSENTIALS

You're a no-compromise, speed-machine – and so is this backpack. With easy access to all your gear, space to carry everything you need, and a lightweight build, in a freedom-to-move design, the Apex 22 backpack will take you to the peak of your mountain ability.

## AIR-FIT CARRYING SYSTEM

### Air Fit Mesh Carrying System

The combination of mesh in the back area and a lighter, forgiving carbon steel frame guarantees outstanding ventilation. The ventilation space between the pack and the suspension system, as well as the ventilation openings, ensure perfect comfort.

### Load lifter straps

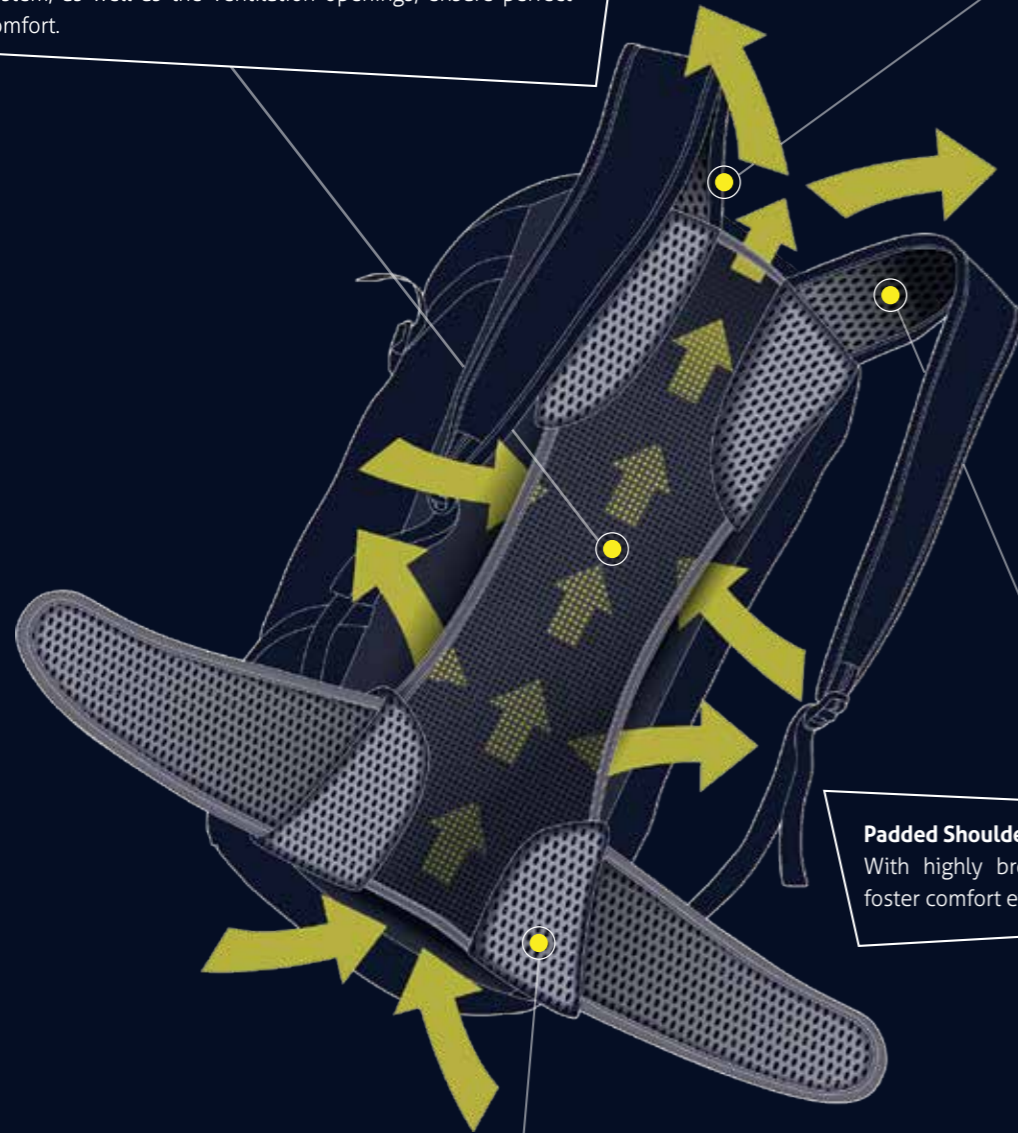

Ensure optimal back fit

### Padded Shoulder straps

With highly breathable mesh on the underside foster comfort even on lengthy tours

### Mesh pads in the low back

Optimize the load distribution and thus increase comfort

# SLEEPINGBAG

A revolution for the sleeping bag market. Sleeping bag colour coding now makes selecting exactly the right bag for you easier than ever before. Our sleeping bag collection has a temperature rating colour scheme enabling you to identify which sleeping bag matches your individual requirements 100%. The colour of the inside material also indicates a down or synthetic sleeping bag.

# SLEEPING BAG TECHNOLOGIES

## SILVERIZED. GENERAL PROTECTION FOR DOWN.

### REVOLUTIONARY: FRESH DOWN

In cooperation with the innovative Swiss company Schoeller Technologies, SALEWA has developed the world's first silver treatment for down fillings.

### Silverized 100% fresh

Clinical studies show that silver is effective against the bacteria that cause odours. Bacteria metabolise sweat and body moisture, emitting waste products that produce strong odours in a sleeping bag. The resultant odour is unpleasant. Silver ions destroy enzymes within the bacteria that are necessary for them to live. The bacteria die off without these enzymes.

Down benefits as follows: reduction of unpleasant smells caused by bacteria.

This means that a treated sleeping bag doesn't smell, even after intensive use. This silverized down treatment dispenses with the need for two stages of chemical dipping, and so reduces the negative impact on the environment. Best of all: For the first time a down sleeping bag is a viable alternative for those suffering from dust allergies, where previously they had to rely on synthetic fillings.

Biocidal treatment based on silver chloride prevents proliferation of odour-producing bacteria.

## HYBRID TECHNOLOGY

PrimaLoft® Silver Insulation Down Blend

### EVOLUTIONARY: 3D FLEX

3D Flex is the next stage of SALEWA's patented Flex design: We increased stretchability by 20%, reduced the weight of the technology, extended the flex zone to cover the shoulder and knee areas (Phantom Flex only), and gave the design more technical capability.
